COUNTY AGENDA REQUEST

Department:	Fire and Emergency Services	Presenter(s):	David J. Scarbrough/Pete Nelms
Meeting Date:	Thursday, October 23, 2014	Type of Request:	Consent

Wording for the Agenda:

Approval of staff's request to award Proposal #P906- Debris Removal to Ceres Environmental Services, Inc. and in so doing entering into a "pre-event" contract with a not-to-exceed amount to be determined based on the nature and extent of damages, and with said contract beginning upon execution and expiring on June 30, 2016, with two options to extend for one year each.

Background/History/Details:

The federal Robert T. Stafford Disaster Relief and Emergency Assistance Act provides legal authority for the federal government to provide assistance during major disasters and emergencies. It authorizes the Federal Emergency Management Agency (FEMA) to provide financial assistance for removing debris from roads and other areas. FEMA encourages state and local governments to proactively determine how to manage large-scale debris clearance, removal, and disposal as part of their overall emergency management plan. Fayette County has the authority to conduct debris removal and disposal operations in the matter it deems appropriate; however, the federal government will provide financial assistance only for costs that they have determined to eligible. This makes it important that the county partner with firms that have a clear understanding of federal rules and regulations, as well as that are competent in rapid deployment and debris removal and disposal. Request for Proposal #906 (RFP #906) was released to procure a firm that would provide federally-defined services if and when needed.

RPF #906 was direct mailed to 19 vendors. Thirty other vendors were contacted through the web-based Georgia Procurement Registry, and invitations were extended via Fayette News, the county's website, and Georgia Local Government Access Marketplace, and Channel 23. Seven firms submitted proposals, of which two were disqualified. An Evaluation Team of county and municipal staff scored the remaining five vendors and recommended Ceres Environmental Services, with concurrence from Public Safety and Purchasing.

What action are you seeking from the Board of Commissioners?

Approval of staff's request to award Proposal #P906- Debris Removal to Ceres Environmental Services, Inc. and in so doing entering into a "pre-event" contract with a not-to-exceed amount to be determined based on the nature and extent of damages, and with said contract beginning upon execution and expiring on June 30, 2016, with two options to extend for one year each.

If this item requires funding, please describe:

This request is for a "pre-event" contract, so there will be no cost to the county unless or until a disaster or other emergency hits and the company is contacted to assist.

Has this request been considered within the past two years?	No	If so, when?	
Is Audio-Visual Equipment Required for this Request?*	No	Backup Provided with Request?	Yes

**** All audio-visual material must be submitted to the County Clerk's Office no later than 48 hours prior to the meeting. It is also your department's responsibility to ensure all third-party audio-visual material is submitted at least 48 hours in advance.***

Approved by Finance	Not Applicable	Reviewed by Legal	
Approved by Purchasing	Yes	County Clerk's Approval	Yes
Administrator's Approval			

Staff Notes:

In the event of a disaster, the county would request performance and payment bonds, establish a not-to-exceed amount based on the nature and extend of the damage, and issue a Notice to Proceed letter to the contractor. Furthermore, this initiative is intended to result in a cooperative agreement, enabling the county's municipalities, to enter into contracts with the winning firm for the same services at the same prices. The selection of the winning firm was enabled through ongoing cooperation between Fayette County and its municipalities.

To: Board of Commissioner

From: David J. Scarbrough, Fire Chief

Date: October 9, 2014

Subject: Approval of proposal #P906 for debris removal services during times of extreme inclement weather or declared county disaster.

Background/History/Details:

Fayette County Emergency Management has coordinated with the County's Public Works Department and the other Municipalities to seek bids for debris removal in the event of extreme inclement weather or a declared county disaster. The current contract is set to expire this month. This contract sets the hourly rate for removal of debris from roadways and establishes a response timeframe to have contracted crews on the ground and operational. By having this contract in place prior to the event, the Road Department and Emergency Management will be better positioned to clear debris and open roadways for emergency response vehicles and the public in the affected area in a timely manner and not experience cost increases due to high demand during inclement weather. Also, having this contract in place will expedite any request for assistance by several days by not having to draft specifications, establish scope of work, and complete a bid process at the time of need.

This proposal was coordinated by Emergency Management and the Public Works Department from each Municipality. This group established the scope of work, which would best meet the needs of all parties and the established response times. Each municipality will accept the bid upon approval on their behalf and it is clearly understood that each municipality will bear the cost of debris removal should they engage the contractor through this contact.

For County purposes the request for implementation of this contract would occur at the recommendation of Public Works and Emergency Management when determined that the amount of debris is beyond the scope of the Road Department ability to clear the debris using current assets, personnel, mutual aid (other Public Works Departments within the County) and that State resources are not available.

Upon approval, this proposal would be for a one-year period with the option to extend annually for two additional years. There are no costs associated with this contract until a "Notice to Proceed" is issued to the Contractor.

Subject: RFP 906: Debris Clearing, Removal, and Disposal

The federal Robert T. Stafford Disaster Relief and Emergency Assistance Act provides legal authority for the federal government to provide assistance during major disasters and emergencies. It authorizes the Federal Emergency Management Agency (FEMA) to provide financial assistance for removing debris from roads and other areas. FEMA encourages state and local governments to proactively determine how to manage large-scale debris clearance, removal, and disposal as part of their overall emergency management plan.

The county has the authority to conduct debris removal and disposal operations in the manner we deem appropriate. However, the federal government will provide financial assistance only for costs that they have determined to be eligible. This makes it important that the county partner with firms that have a clear understanding of federal rules and regulations, as well as that are competent in rapid deployment and debris removal and disposal.

Request for Proposals (RFP) #906 was released to procure a firm that would provide the following services, as defined by federal regulations, if and when needed:

1. ***Debris clearing***: For the first 70 hours after a natural or man-made disaster, federal participation is available only for efforts to clear debris from the roads, so that emergency services can continue.
2. ***Debris removal***: After the first 70 hours, FEMA will provide funds to help pay the costs of loading debris onto trucks, hauling it to staging areas, and reducing it (e.g. burning or chipping trees).
3. ***Debris disposal***: All debris must be properly disposed of. For example, white goods (e.g. refrigerators or air conditioners) must be drained of hazardous materials.

RFP #906 was direct-mailed to19 vendors. Another 30 were contacted through the web-based Georgia Procurement Registry. In addition, invitations were extended via the Fayette News, the county website, Georgia Local Government Access Marketplace (www.glga.org), and Channel 23.

Seven firms submitted proposals. The RFP required that cost proposals be contained in a separate, sealed envelope. One firm did not do this, and was therefore disqualified. Another was disqualified

because they did not provide the required audited financial statements. This left five proposals to be considered (Attachments 1 & 2).

Proposals from the five remaining firms were scored by an Evaluation Team, which was composed of staff from Emergency Management, Public Works, the City of Peachtree City, and the City of Fayetteville. The three highest-scoring companies were invited to come and give one-hour presentations to the Evaluation Committee and Purchasing Department staff.

The RFP states, "It is intended that this initiative will result in a cooperative agreement, enabling other jurisdictions within Fayette County to enter into contracts with the winning firm for the same services, at the same prices." Staff from municipalities participated in the RFP development and proposal evaluation processes.

This will be a "pre-event" contract, so there will be no cost to the county unless and until a disaster or other emergency hits, and the company is contacted to assist. At that time, the county would request performance and payment bonds, establish a not-to-exceed amount based on the nature and extent of the damage, and issue a Notice to Proceed letter to the contractor.

The multi-jurisdictional Evaluation Committee recommends Ceres Environmental Services, Inc. for the contract for debris clearing, removal, and disposal. I concur with their recommendation.

Subject: Agenda Backup - Debris Removal

Everyone,

The Purchasing Department has added backup information for the October 23 BOC meeting, in the Fire/EMS folder. It pertains to RFP 906 for a debris removal contract. Please note that this is a "pre-event" contract, so the not-to-exceed amount is determined after a disaster occurs, and the extent of the damage can be seen. This is explained in the next-to-last paragraph of the Purchasing Department backup memo.

Thanks,
Ted Burgess

PROPOSAL #P906 DEBRIS REMOVAL
EVALUATION SCORING SHEET

Summary

		MAX POINTS	ASHBRITT, INC.	BERGERON EMERGENCY SVS, INC.	CERES ENVIRONMENTAL SERVICES, INC.	GRAHAM COUNTY LAND COMPANY, LLC	MICHAEL'S TREE & LOADER	SOUTHERN DISASTER RECOVERY	TFR ENTERPRISES, INC.
