PERMIT APPLICATION

Obligation. The Fayette County Permits & Inspections Department (FCPID) has no obligation to explain every requirement, construction code, ordinance or law prior to or during the course of this project. Any and all construction codes, ordinances or laws are enforceable at any time, with or without prior notification.

Validity of permit. The issuance of a permit shall not be construed to be a permit for, or an approval of, any violation of any of the provisions of the construction codes or of any other ordinance. Permits presuming to give authority to violate or cancel the provisions of the construction codes or ordinances of the jurisdiction shall not be valid. The issuance of a permit based on construction documents and other data shall not prevent the FCPID from requiring the correction of errors in the construction documents and other data. The FCPID is also authorized to prevent occupancy or use of a structure where in violation of the construction codes or of any other ordinances of this jurisdiction.

Expiration. Every permit issued shall become invalid unless the work authorized by such permit is commenced within 180 days after its issuance, or if the work authorized by such permit is suspended or abandoned for a period of 180 days after the time the work is commenced. A minimum of one inspection approval must be obtained as evidence that work was commenced or that work has continued. The determination as to whether work was suspended shall be based on the most recent inspection approval date.

Placement of permit. Work for which a permit is required shall not be commenced until the building permit or copy thereof is posted on the site of the work until the completion of the project. The posted permit shall be visible from the street and maintained in such location by the permittee until final approval has been granted by the FCPID.

Inspection record card and approved construction documents. Work for which a permit is required shall not be commenced until the permittee has made available an inspection record card and approved construction documents on the premises and in such a position to allow the FCPID convenient access and use. These items shall be protected from the elements and maintained in such location by the permittee until final approval has been granted by the FCPID.

Public duty, warranty and quality control. The permitting, plans examination or inspection conducted with regard to a building or structure in accordance with Chapter 5 of the Fayette County Code (this code) constitutes a public duty and does not warrant or ensure the absence of any hazard, deficiency or other matter. Any duty created by or based on this code is transferred to the public, and no private cause of action is created by a breach of such duty. This code shall not be construed to relieve from or lessen the responsibility of any person, firm or corporation owning, operating or controlling any building or structure from any damages to persons or property caused by defects, nor shall the FCPID be held as assuming any such liability by reason of the inspections or plans examinations authorized by this code or any permits or certificates issued under this code. The FCPID checks for substantial compliance with this code, but reviews and inspections performed by the FCPID pursuant to this Chapter do not create any guarantee or warranty that buildings, structures or service equipment have been constructed in accordance with all provisions of this code. The permitting, plans examination, or inspection of any building, structure, system, element, or construction document shall not be construed as a warranty of the physical condition or adequacy of such building, structure, system, element, or construction document, including without limitation a representation or warranty that a building or structure is complete, that it is in compliance with this code or any other law, that it was inspected, that it is safe or ready for occupancy or that it meets any particular degree of quality or workmanship. Quality control of materials and workmanship is not within the purview of this code except as it relates to the purposes stated therein. The amount and quality of inspection and other services provided is discretionary with the FCPID and may vary in response to the amount of staff, work load, training and experience, funding and other pertinent factors affecting whether and how inspection is made or whether any hazard, deficiency or similar matter is observed.

Amended construction documents. Work shall be installed in accordance with the approved construction documents, and any changes made during construction that are not in compliance with the approved construction documents shall be resubmitted for approval as an amended set of construction documents. Willful and prejudicial departure from or disregard of construction documents in any material respect without the approval of the FCPID is unlawful.

Inspections - general. Construction or work for which a permit is required shall be subject to inspection by the FCPID and such construction or work shall remain accessible and exposed for inspection purposes until approved. Approval as a result of an inspection shall not be construed to be an approval of a violation of the provisions of this code or of other ordinances of the jurisdiction. Inspections presuming to give authority to violate or cancel the provisions of this code or of other ordinances of the jurisdiction shall not be valid. It shall be the duty of the permit applicant to cause the work to remain accessible and exposed for inspection purposes. Neither the FCPID nor the jurisdiction shall be liable for expense entailed in the removal or replacement of any material required to allow inspection. Inspections will not be performed in (1) the presence of unrestrained animals, (2) in the presence of minors without a parent or legal guardian present, or (3) in an occupied structure without the contractor, owner or owner's agent present.

Inspection requests. It shall be the duty of the permit holder or their agent to notify the FCPID that such work is ready for inspection. It shall be the duty of the person requesting any inspections required by this code to provide access to and means for inspection of such work.

Inspection results. Inspection results (e.g. approved, disapproved, cancelled, discrepancy items, etc.) are not valid unless provided in writing.

Temporary power. The FCPID shall issue a temporary release on the electrical service conductors and service switch for a maximum period of 30 days. I assume all liability and responsibility for any use of electricity in the building during this period. I understand that an extension of this temporary approval must be applied for if work is not completed by the expiration date. The Building Official may refuse to extend this service and direct the utility company to disconnect service in the absence of an extension. I relieve Fayette County and its agents from liability for damage or loss for ordering the electrical service disconnected from the wiring system. I further understand that no occupancy of the subject building is to be allowed during this use of temporary service, and that any occupancy will result in immediate disconnection of electrical service.

Electrical testing, calculations and marking. The FCPID shall not be liable or held as assuming any such liability for the accuracy of or failure of the permit holder, their agent/s or contractor/s to perform any pre-energization and operating tests, performance testing, acceptance testing, fault current or electrical load calculations or field marking/s as outlined in the code.

Use and occupancy. No building or structure shall be used or occupied, and no change in the existing occupancy classification of a building or structure or portion thereof shall be made until the FCPID has issued a certificate of occupancy therefor as provided herein. Issuance of a certificate of occupancy shall not be construed as an approval of a violation of the provisions of this code or of other ordinances of the jurisdiction. Certificates presuming to give authority to violate or cancel the provisions of this code or other ordinances of the jurisdiction shall not be valid.

Revocation. The FCPID shall, in writing, suspend or revoke a certificate of occupancy issued under the provisions of this code wherever the certificate is issued in error, or on the basis of incorrect information supplied, or where it is determined that the building or structure or portion thereof is in violation of any ordinance or regulation or any of the provisions of this code.

FOUNDATION SURVEY REQUIRED: RESIDENTIAL - A foundation survey of the lot shall be required for lots equal to or less than 15 acres to verify that the building or structure is located within the designated setbacks and in accordance with the approved plans for the following: 1. For all newly constructed single-family dwellings. 2. For residential accessory structures and additions located within two feet of the setback, floodplain and/or watershed protection areas. The foundation survey shall occur after concrete is placed and shall be submitted to and approved by the Fayette County Planning & Zoning Department and Environmental Management Department prior to the commencement of any framing operations or work.

COMMERCIAL - A signed and sealed foundation survey by a registered land surveyor shall be required after the foundation is poured and prior to the commencement of any framing operations or work for new projects or as required by the Planning and Zoning Department.

I certify that I have a legal right to apply for this building permit, and I have received all approvals required.
I certify that I have read this application (or declined the opportunity to do so) and state that the information provided is correct. I agree to comply with all county ordinances and state laws relating to building construction, and hereby authorize representatives of the FCPID to enter the above-mentioned property for inspection purposes. I certify that I have a legal right to apply for this building permit and to authorize entry. Additionally, I certify that this application is not in conflict with any deed restrictions of record; is in conformity with all conditions, covenants and restrictions; and I have received all approvals required.

I have received (or declined receipt of) a copy of these requirements.

OWNER/BUILDER EXEMPTION:
I am exempt from the Georgia State licensure requirements per O.C.G.A. 43-41-17(h) and have not applied for a permit under this exemption within the previous 24-month period.
