

Starr's Mill School Tunnel

Category: Pedestrian, Bicycle and Multi-Use Path Projects

Location: Redwine Road at Panther Path

Estimated Cost: \$900,000

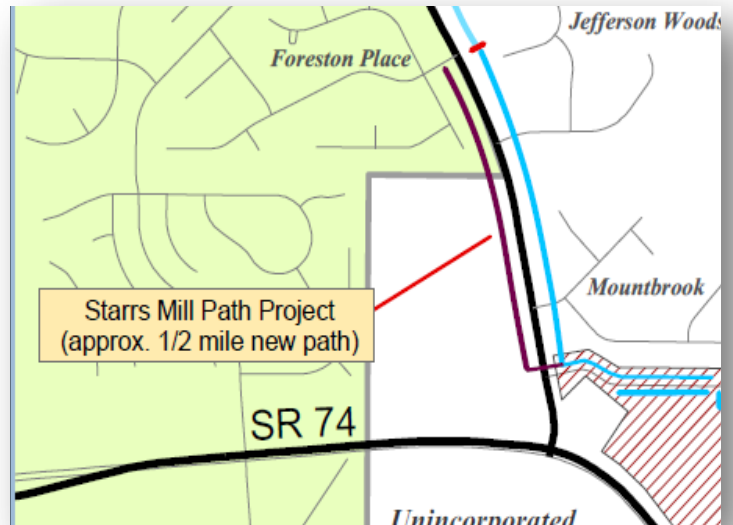

Project Description

This path project provides a tunnel under Redwine Road at Panther Path, the entrance to the Starr's Mill School complex. A tunnel provides pedestrians, bicyclists and golf carts safe passage across Redwine Road without impacting vehicular traffic. It includes construction of a new path (approximately 0.5 miles) on the west side of Redwine Road from Summer Place to Panther Path.

The intent is to provide a permanent and safe crossing option for path users who are on the west side of Redwine Road to the school complex.

A 2015 survey counted approximately 600 golf cart trips per day along Panther Path with half originating from the west side of Redwine Road at the Summer Place.

Map Location

The blue portion in the above map identifies existing multi-use paths that are located east of Redwine Road. The purple portion identifies the new multi-use path that will be installed with this project.

Proposed Project

It is anticipated that a multi-use path along the west side of Redwine Road would significantly reduce the number of carts and pedestrians crossing Redwine Road and the hazardous intersection of Foreston Place. The concrete tunnel will be installed south of Panther Path allowing safe passage for carts and pedestrians.
