Subject: RFQ 27057-A: Kiwanis Park Barrier Netting
Addendum #2

Gentlemen/Ladies:

Below, please find responses to questions, clarifications, and additional information for the above-referenced Request for Quote. This information shall be considered when preparing your quote.

1. **On 27047-A Addendum #1, a Georgia general contractor license was needed because of the new 50-foot poles and foundations. Since 27057-A only replaces the netting on the existing poles, and we'd have an experienced netting installer doing the work, would the County still need us to hold a general contractor license or any other contractor license for this one?**

   No. As stated in Addendum #1, the County does not require a specific professional license beyond applicable Georgia business registration for the replacement netting work described in RFQ 27057-A.

2. **On the netting itself, the spec calls for 2.4 mm Enduro Hybrid thread with a 295 lb break strength, but the maker lists its 2.4 mm thread at 195 lb. Should we go by the thread size or the break strength?**

   The 295 lb break strength requirement shall govern.

3. **For the wind load language, would the maker's data and installation instructions cover it, or is the County expecting sealed engineering?**

   All connections and attachments shall comply with the manufacturer's installation instructions and specifications. Stamped engineered drawings are not required.

4. **Could you send a location map or aerial of Kiwanis Park that identifies Fields #5 and #6? I looked on-line and couldn't locate one. The park has several diamonds, and we want to be sure our measurements and our quote are for the correct fields.**

   See attached map.

5. **May a respondent rely on its named installation subcontractor's three completed ballfield barrier-netting projects to satisfy the experience requirement, or must the responding company itself have completed three projects?**

   No. The three required references must be for projects completed by the responding company/prime contractor.

6. **Could you also clarify whether "within the last 5 to 10 years" means references may date back up to ten years?**

   Yes.

7. **We are interested in reviewing this opportunity and would appreciate any available drawings, pole layouts, site photos, or additional project documents for our estimating team.**

   See attached map.

8. **Could you also confirm whether all existing poles will remain in place or if any pole replacements or modifications are anticipated?**

   All existing poles will remain in place.

9. **We saw in Addendum 1 that alternatives need to meet all the minimum specifications. Would the County consider a twisted knotted nylon net that meets the 1-3/4 inch mesh, black UV-treated and 295 lb break strength requirements, or does it need to be knotless?**

   The RFQ requires knotless nylon netting. Alternative products may be considered; however, they must meet all minimum specifications stated in the RFQ, including the knotless requirement.

10. **The addendum indicates the three comparable references must involve baseball-field barrier netting. If Coldsteel serves as prime and uses a qualified sports-netting installer with three completed baseball-field barrier-netting projects, may we submit that installer's three references along with Coldsteel's own fencing references? Or must all three baseball-netting projects have been contracted directly under Coldsteel's business name?**

    The three required ballfield barrier-netting references must be for projects completed under the responding company's/prime contractor's business name. References for projects completed solely by a proposed installer or subcontractor will not satisfy this requirement.

11. **Please also confirm whether the netting dimensions are provided for estimating purposes or whether all measurements must be taken in person, and whether the specific RFQ's email quotation instructions at tcarnell@fayettecountyga.gov control over the general sealed-bid instructions on the County bid opportunities page.**

    Vendors are responsible for field-verifying required dimensions prior to submitting a quote, as stated in the RFQ and Addendum #1. The submission instructions contained specifically in RFQ 27057-A govern this solicitation. Quotes may be submitted by email or fax as provided in the RFQ.

12. **Subcontractor references: May the prime contractor satisfy the three ballfield netting reference requirement using its proposed installation subcontractor's completed projects?**

    No. The prime contractor may not satisfy the three required ballfield barrier-netting references using projects completed by its proposed installation subcontractor. The required references must demonstrate experience of the responding company/prime contractor.

13. **Wind-load requirements: Please identify the required design wind speed and exposure category. Are manufacturer specifications sufficient to demonstrate compliance, or are Georgia engineer-stamped calculations required, including verification of existing poles and foundations?**

    All connections and attachments shall comply with the manufacturer's installation instructions and specifications. Stamped engineered drawings are not required.

14. **Existing support system: Should bidders assume existing poles, cables, anchors, and tensioning hardware are serviceable? How should pre-existing defects discovered during installation be addressed and priced?**

    Bidders shall assume the existing poles, cables, anchors, and tensioning hardware are serviceable. If a pre-existing defect is discovered during installation, the contractor shall notify the County Representative before proceeding with work affecting that component. The County will evaluate the condition and determine the appropriate corrective action. Any additional work shall require prior County authorization.

15. **Equipment access and staging: Which access routes and gates may contractors use for aerial lifts? Are there equipment weight restrictions or ground-protection requirements, and may lifts and materials remain in a designated area overnight?**

    There will be a preconstruction meeting with the successful vendor to discuss access routes and gates which will be very close to the fields. Ground protection should be utilized when appropriate. See Contractors' responsibility in specification in regards to damage done by the crew.

16. **Warranty: What minimum warranty periods and coverage are required for netting, attachment hardware, and installation workmanship?**

    The minimum warranty requirements are as follows:
    - Manufacturer Defects: 1-3 years
    - UV and Weather degradation: 3-5 years
    - Installation workmanship: 1 year

17. **Please let us know if any forms beyond the quote package are required, or if the County would permit a field visit before the deadline.**

    Responders shall submit the documents identified in the RFQ Checklist of Required Documents and any subsequently issued addenda. No additional forms are required unless otherwise stated by addendum. Vendors may visit Kiwanis Park prior to the quote deadline in accordance with the site-access information provided in Addendum #1.

Received by (Name):_____ Company_____

Note: If this addendum is not returned to the Fayette County Purchasing Department, or if it is returned unsigned, responding individuals, companies, or other organizations will still be responsible for the requirements of this addendum and the specifications or changes herein.

The due date for this RFQ **remains unchanged**. Quotes will be accepted until **3:00 p.m. on Monday, November 16, 2026**. Quotes must be received via email to Tamia Carnell, Buyer & Contract Coordinator, at tcarnell@fayettecountyga.gov or via fax to (770) 719-5534 at or before the due date.

The deadline for inquiries has passed, so the Purchasing Department will not be able to accept any additional questions after this time.

For administrative matters or questions about the procurement process, please contact Tamia Carnell, Buyer & Contract Coordinator at (770) 305-5150 or email at tcarnell@fayettecountyga.gov.

Sincerely,

Sherry White for Ted Burgess
