Severe Weather

In 2011 Fayette County Emergency Management (EMA) was successful in securing a grant for the construction of a new Emergency Operations Center. This grant was for \$1,000,000.00. This facility will better serve the County in emergency operations during inclement weather and disaster situations.

During 2011 the National Weather Service issued 5 tornado warnings for Fayette County, one resulting in 2 tornado touchdowns. One EFO touched down on Hill Road in north Fayette County and an EF1 touched down on Mud Bridge Road in southern Fayette County. These tornadoes produced winds ranging from 70 to 95 MPH. In addition, the county had warnings for a winter storm (January), a flash flood (September), 19 Thunderstorm Warnings, and 14 Significant Weather Alerts.

Fayette County Emergency Management Agency (EMA) urges you to have multiple ways to be alerted to severe weather. A weather radio in your home is one of the best methods for early notification. The outdoor severe weather warning system will alert in the areas of recreation and schools, and most smart phone users can receive warnings from the weather services or their providers.

Once you have the warnings and alerts know where to take cover and routinely drill with members of your family for the event of severe weather. For further information on severe weather contact Fayette County EMA or www.ready.ga.gov

Remember to keep a fire extinguisher nearby in the home.

Residential Burn Permits can be obtained by calling:

770.305.5468

October 1 - April 30

Outdoor Burning Ban is May 1 through September 30

Check your smoke detectors and remember to change the battery.
