### 2022 Incidents By Time

# **Emergency Management Agency**

Fayette County Emergency Management Agency is responsible for coordination, planning, and liaison activities with municipal, state, federal, private sector, and non-governmental organizations to maintain Fayette County's ability to mitigate, prepare, respond, and recover from disasters while maintaining our eligibility for disaster assistance and reimbursement at the maximum level allowed.

After spending much of 2020 and 2021 focusing on the COVID-19 response, EMA's involvement in COVID-19 was significantly reduced in 2022, which allowed for mitigation efforts to be redirected toward other hazards. The final close-out of FEMA-DR-4259 occurred in 2022. This federally declared disaster impacted Fayette County around Christmas of 2015 and resulted in infrastructure damage at several locations. Following the completion of repairs, FEMA has reimbursed Fayette County for all qualified expenses associated with this disaster.

Other notable activities and accomplishments for 2022 include:

- Eligibility for an incentive program directed by the State of Georgia that qualifies Fayette County for a reduced cost share for FEMA-approved disaster expenses
- Coordinated the opening of a warming center located at Bennett's Mill Middle School in order to provide protection from extremely cold temperatures during Christmas 2022
- Assisted Spalding County with the development and execution of a mass casualty exercise
- Participation in three Fayette County disaster exercises
- Coordinated Hazard Mitigation grant applications
- Coordinated testing and maintenance of the outdoor warning siren system
- Assisted fire victims by performing liaison functions with the American Red Cross
- Assisted the Training Division with NPQ check-offs

### **Community Partnerships:**

# **Fire/EMS Training**

In 2022, the Department completed two fire recruit classes with a total of 16 personnel. Each class was 480 hours long and included both mental and physical challenges for these recruits. Upon completion, these men and women successfully completed the National Professional Qualifications Firefighter Level I and II testing process.

The training division, along with adjunct instructors from line personnel, provided several continuing education courses. These courses expand the knowledge and skill-set of personnel to ensure we provide the highest level of care and services to the citizens of Fayette County.

The classes provided in 2022 were: Fire Apparatus Operator, Fire Instructor I, Fire Officer I, Fire Officer II, Advanced Medical Life Support, Pre-Hospital Trauma Life Support, Emergency Pediatric Care, and Basic Life Support.

In addition to the training provided by the Department, many personnel attended courses at the Georgia Public Safety Training Center, Bearers of the Oath fire conference, Fire Department Instructor Conference, and Alabama Fire College.

# **Bureau Of Fire Prevention**

The Bureau of Fire Prevention is the first line of defense against loss of life and property due to fires in Fayette County. Our goals are achieved through annual fire and life safety inspections, fire investigations, quality public safety education programs, fire alarm and sprinkler acceptance testing, life safety plan reviews on new construction and remodels, and periodic inspections as required or requested by business owners.

We provide public safety education to many citizens throughout the year, from preschool age to seniors. These programs include our 3rd grade fire safety education at all the elementary schools in unincorporated Fayette County, safety education at the Fayette Senior Center, events at local churches and other organizations, and fire extinguisher training for citizens and businesses within Fayette County.

Thanks to the generosity of many businesses and individuals in the county, along with the Fayette County Board of Education and the support of the Fayette Fire Foundation, we have been able to add a new tool to our education program. The Fire Safety Education Bus provides high quality, interactive training to all citizens of Fayette County at almost any location. Constructed inside a repurposed school bus, it features 3 rooms: a non-functioning kitchen, a living room, and a bedroom. Each of these areas has a different program discussing fire safety, home safety, and even weather safety. The Fire Safety Bus was completed in Spring of 2022 and has attended many events throughout Fayette County.

Along with serving all of unincorporated Fayette County, we also provide fire prevention services to the towns of Tyrone, Brooks, and Woolsey. We work closely with the leadership in each of these communities to provide a fire-safe environment for their residents, businesses, and visitors.

Inspections Conducted— <b>425</b>	Fire Investigations Conducted— <b>25</b>
Plan Reviews- 85	Public Relations Programs— 92
Preplan Updates— 1,107	Total Public Education Participants— 7,738
New Businesses— 156	Smoke Detector Installations— 4

Burn Permits Issued— 14,068 - Residential 1 - Commercial

2022 Fire Loss- **\$3,795,922** Structural **\$454,629** Vehicle, Brush and Other

# 2022 Year in Review

#### Incidents

In 2022, the Department continued to see an increase in the number of incident responses. Most of the increase continues to be in Rescue/Medical incidents. The increase in the number of Rescue/Medical incidents annually are related to an aging population and the overall growth in Fayette County. Other contributing factors are the increase in mental health related incidents and the current opioid epidemic, both of which are impacting communities nationally. The number of fire incidents in 2022 remained stable; however, the Department responded to two of the largest commercial fires in department history including the Red Door consignment store fire in Tyrone and the Walmart fire in Peachtree City.

#### **Administrative Support**

In 2022, the Board of Commissioners approved a 19% salary increase for all certified Public Safety Personnel and a 10% salary increase for all other County personnel. In addition, the Board also approved merit increases for personnel based on performance measures. These salary increases assist in lessening the financial burden of staff, and aid in both recruitment and retention of personnel. The Department is extremely grateful for the support it continues to receive from both the Board of Commissioners and County Administration.

#### **Fayette Fire Foundation**

The Fayette Fire Foundation, Inc. is a 501(c) 3 nonprofit foundation. Their mission is to aid, support, and assist by gifts, contributions or otherwise, to Fayette County Fire and Emergency Services. One hundred percent of all donations go to support Fayette County Fire and **Emergency Services.** In 2022, the Fayette Fire Foundation awarded the Maurice Worth Fire Foundation Educational Scholarship to eight personnel. Each scholarship was for \$2,000 for a total of \$16,000. These scholarships assist personnel with achieving higher education which enhances their abilities to better serve the citizens of Fayette County.

#### **Insurance Services Office Review**

In September of 2022, the Department underwent its comprehensive review from the Insurance Services Office (ISO). ISO rates fire departments on their fire suppression capabilities. These evaluations are based on standards and certain criteria and are used by insurance companies to formulate insurance rates for homeowners and businesses. The Current ISO rating for unincorporated Fayette County is a 3/3Y. The Department awaits the result from last year's review.

#### **Fleet Enhancements**

In 2022, the Department took delivery of a new pumper to replace Engine 6 at Station 6 in Brooks. The custom cab upgrade provides uniformity of all first due engines with up-to-date firefighting technologies including an onboard firefighting foam tank. These units provide better maneuverability for Fire Apparatus Operators, include more safety features, and are more versatile than their predecessors.

The new rescue boat responds out of Station 7 in Woolsey. Boat 7 is a 17 ft 5-person Tracker with a 40 HP Mercury motor and a Minn Kota trolling motor. Boat 7 has on-board electronics including sonar for locating victims who may be submerged below the surface of the water. This unit is safer, provides for easier patient loading, and more versatile than the previous vessel it replaced.
