Job Summary: This is a part-time intern position without benefits. It is our expectation the intern will work 20 hours per week for a period of six weeks.

The Laboratory and Compliance Intern will assist with sample collection and laboratory analysis in the Water System Laboratory.

Major Duties:

- 1.) Assists in the collection of water samples from streams and reservoir.
- 2.) Assists in performing standard chemical, biological, and physical testing, under the supervision of laboratory staff.
- 3.) Assists the Lab Analyst with sampling related to the Safe Drinking Water Act's Unregulated Contaminants Monitoring Rule.
- 4.) Receives training on laboratory operations, good lab practices, lab safety, and quality control protocols.

Job Requirements:

1. Must be comfortable working in an office setting, laboratory setting, and in the field.
2. The intern should have an interest in chemistry, biology, environmental science, health sciences, public policy, or a related field.
3. Previous lab experience is a plus, but not required.
