Subject: Bid #909 – Kirkley Road Culvert Headwalls

Public Works Department needs a contractor to cast-in-place GDOT Standard 1125 built-in-place concrete headwalls to be constructed on each end of two new 96-inch diameter reinforced concrete culvert pipes to be replaced on Kirkley Road at Trickum Creek.

The Purchasing Department issued Invitation to Bid #909 to seek bids for this purpose. Invitations were direct-mailed to 32 contractors. Through the Georgia Procurement Registry, we contacted 484 contractors. In addition, invitations were extended via the Fayette News, the county website, Georgia Local Government Access Marketplace (www.glga.org), and Channel 23.

Three contractors responded to the invitation to bid (Attachment). Public Works recommends the company that submitted the lowest bid, North Georgia Concrete, Inc., at \$54,500. Funds are budgeted and available for Kirkley Road storm & drainage improvement in Organization 50940320, Project 2320E.

I concur with Public Works' recommendation. If you approve, Purchasing will issue a contract.
