

Photo 1: Culvert is open to flowing water. Roadway has been reopened to traffic. (12/14/2017 – Road was reopened on 11/16/2017)

Photo 2: Guardrail installation has been completed. (11/16/2017)

Date:11/16/2017 & 12/14/2017

Photo 1: The road and residential driveway apron have been paved. (11/13/2017)

Photo 2: Additional fill has been placed and graded on the shoulder along the newly paved road section. The shoulder is prepped for guardrail installation. (11/14/2017)

Date:11/13/2017 & 11/14/2017

Photo 1: Roadway continues to be prepped for future paving. (11/06/2017)

Photo 2: Soil stabilization has been placed along the south side of the road. (11/07/2017)

Date:11/06/2017 & 11/07/2017

Photo 1: Roadway is being prepped for future paving.

Photo 2: Roadway side slopes are graded and complete.

Date:11/03/2017

Photo 1: Backfill, compaction and grading continue at the work site, in preparation for paving. (11/02/17)

Photo 2: Backfill, compaction and grading are in progress. (11/01/2017)

Date:11/01/2017 & 11/02/2017

Photo 1: Back fill has been placed and compacted at the culvert. (10/27/17)

Photo 2: The shoulder area has been graded and prepped for the guardrail pad. (10/26/2017)

Date:10/26/2017 & 10/27/2017

Photo 1: Field measurements are underway for shoulder grading and guardrail locations. (10/25/17)

Photo 2: Heavy rains occurred early in the day. The erosion control team was on site placing hay on all work site disturbed areas. (10/23/2017)

Date:10/23/2017 & 10/25/2017

Photo 1: North of culvert: Silt fence has been reinstalled around the excavated soil along the northwest bank of the creek (left side of culvert). (10/20/17)

Photo 2: North of culvert: Grading, filter fabric and rock is in progress. (10/19/2017)

Date:10/19/2017 & 10/20/2017

Photo 1: Culvert construction is now 100% complete (north side view).

Photo 2: South of culvert: Filter fabric and rock is complete on both sides of the creek.

Date:10/18/2017

Photo 1: 2nd Half of culvert: Rebar and forms have been installed.

Photo 2: South of culvert: Filter fabric and rock have been placed on creek grading.

Date:10/13/2017

Photo 1: Concrete forms for the 2nd half of the culvert are being installed. The first half of the culvert is complete.

Photo 2: South of culvert: Grading has been initiated.

Date:10/12/2017

Photo 1: Concrete is being poured for the first half of the culvert walls, wings, and top.

Photo 2: A concrete vibrator is being used for compaction in the walls.

Date:10/11/2017

Photo 1: Concrete forms and rebar are placed for construction of final section bottom plate and wingwall footers.

Photo 2: Gravel is placed in the apron area of the culvert.

Date: 10/06/2017

Photo 1: The bottom plate and wingwall footer construction is complete for first half of new culvert. Concrete forms and rebar are being placed for second half of culvert.

Photo 2: The bottom plate and wingwall footer construction is complete for first half of new culvert. Concrete forms and rebar are being placed for second half of culvert.

Date: 10/05/2017

Photo 1: Tar Creek has been diverted. The ends of the corrugated metal pipes were exposed and removed on the north side of Lee's Mill Road.

Photo 2: Tar Creek has been diverted and demolition begins on the south side of Lee's Mill Road.

Date: 09/29/2017

Photo 1: The asphalt is being cut and removed from the roadway, to allow culvert access.

Photo 2: Both water main valves (#1 pictured above) are installed and require backfill and compaction.

Date: 09/28/2017

Photo 1: Excavation in the creek bed on the north side of the culvert.

Photo 2: Culvert replacement design requires water line relocation. New water line (pictured above) is being installed.

Date: 09/27/2017

General Information				
Project ID				
Street Name	Lees Mill Rd			
Site Visit Date	1/20/2016			
Road Classification	Rural			

Project Notes

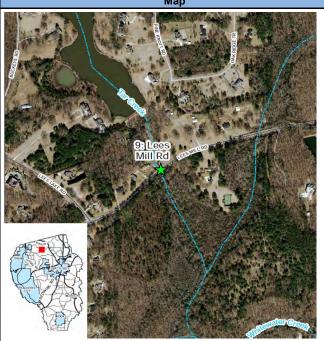

Culvert replacement alternatives to provide flow capacity for the 100 year storm peak runoff.

Field Notes			
Design (Existing Site Features)			
Existing Road Laneage	2-12'		
Existing ShId Width (paved and grass) (feet)			
Existing Side Slopes			
Existing Guardrail	No		
Depth fm Pavement to Top of Culvert (ft):	(+/-) 5.2'		
Pipe Type and Size	3 - 72" CMP		
Pipe Condition (1-5) (1 is new)	5		
Condition Notes: Existing culverts do not provide service for the 100			

Condition Notes: Existing culverts do not provide service for the 100 yr storm event.

Pavement Type/Condition

• •				
Environmental Features				
Wetlands	TBD			
Ditches	YES			
State Waters	YES			
Utilities (Visual Inspection)				
Electric	Aerial			
Cable	Unknown			
Phone	Unknown			
Gas	Underground			
Water	Underground			
Sewer	Underground			
Othor				

Stage Construction Options		
Close Location to Traffic	Х	
Maintain One Lane - No Temp Pavement		
Maintain One Lane - Temp Pavement		

Stage Construction Notes: Assumed road closure

Other			
Proposed Design			
Roadway Section	Typical		
Culvert Size & Material	-8'X7' Concrete Box Culvert with associated wing walls and rip-rap.		
Utility Relocations	5" Waterline		
Guardrail Replacement			
Miscellaneous Features			

Asphalt/Good

Planning Cost Estimate				
Type	Notes	Total		
Design	Actual Cost including Environmental Permitting and Eng of Record Administrative Fee	\$51,470		
Right of Way Cost	Assuming UPS/DWS ends extends past ROW 1/20 acre	\$17,424		
Utility Relocation Cost		\$132,521		
Construction Cost	Includes 1/8 acre clearing and grubbing, guardrail installation	\$310,434		
	Total Planning Estimate	\$511,849
